Eastern Red Cedar

RICH COLOR, RUSTIC CHARACTER

BBB ACCREDITED BUSINESS

Consider Eastern Red Cedar for a wood fence with its own natural color, grain, and character.

APPEARANCE	Reddish-brown and purplish tones, often with lighter sapwood. Distinctive color variation and grain. Despite its common name, it is a juniper rather than a true cedar.
DURABILITY	Wood is naturally resistant to decay and many wood-damaging insects.
MAINTENANCE	Color changes with sun and moisture exposure. Stain or sealer can help preserve its original appearance.
THICKNESS	5/8-inch pickets. Thicker pickets generally last longer and are less likely to warp, split, or rot.

EXPECTED SERVICE LIFE	**15–30 years**

Actual service life varies; wood content, lumber quality, construction, exposure, and maintenance are important.

THE RIGHT FENCE STARTS WITH THE RIGHT MATERIALS.

Compare our showroom samples in person. Natural wood color and grain vary from picket to picket. Fence longevity also depends on lumber grade, wood content, construction, exposure, and care.

80 YEARS OF EXPERIENCE • SERVICE • WORKMANSHIP • QUALITY MATERIALS
