Redwood

RICH COLOR, NATURAL BEAUTY

BBB ACCREDITED BUSINESS

Consider Redwood for a wood fence with its own natural color, grain, and character.

APPEARANCE	Color ranges from light pinkish-brown to deep reddish-brown. Straight grain and fine texture give Redwood its distinctive appearance, with natural variation from picket to picket.
DURABILITY	Redwood has natural resistance to decay and insects. Durability varies with lumber grade and growing conditions.
MAINTENANCE	Redwood naturally weathers to a soft gray when exposed to sun and moisture. Stain or sealer can help preserve its original color.
THICKNESS	5/8-inch pickets. Thicker pickets generally last longer and are less likely to warp, split, or rot.

EXPECTED SERVICE LIFE	**15–25 years**

Actual service life varies; wood content, lumber quality, construction, exposure, and maintenance are important.

THE RIGHT FENCE STARTS WITH THE RIGHT MATERIALS.

Compare our showroom samples in person. Natural wood color and grain vary from picket to picket. Fence longevity also depends on lumber grade, wood content, construction, exposure, and care.

80 YEARS OF EXPERIENCE • SERVICE • WORKMANSHIP • QUALITY MATERIALS
